FACT SHEET
THERMOPLASTIC ELASTOMERS FOR RESPIRATORY APPLICATIONS

TPE FOR RESPIRATORY MASKS
- Reliable quality for medical devices
- Adhesion to PP, ABS, PC, PBT or PA
- Thermoplastic processing
- Conformities in medical technology

Medical compounds for masks
- Respiratory equipment
- Disposable products for the respiratory support
- Oxygen masks
- Domestic or clinical applications

Selected compounds have the common conformities in medical technology
- DIN ISO 10993-4 “Hemolysis, indirect in human blood”
- DIN ISO 10993-5 “Cytotoxicity”
- DIN ISO 10993-10 “Intracutaneous irritation”
- DIN ISO 10993-11 “Acute Systemic Toxicity”
- USP Class VI

Technical data of Series MC/tl

OUR KNOW-HOW – YOUR ADVANTAGE
- Fast product development at highest requirements
- High and reliable quality
- Worldwide availability of the compounds
- Support with application technology
- More than 10 years of experience in the medical sector
- Sterilizability according to current pharmaceutical and medical standards
- Change Control Management
- Resistance and flexibility
- Processable in injection molding and extrusion
- Adhesion by 2-component injection molding with PP or ABS, PC, PET, PET-G and with polyamides
- Low friction and highly elastic
- High transparency and possibility of pre-coloring
- Below the usual limits for heavy metals and phthalates
- Free from latex and PVC

Head of Sales Medical Matthias Schmidt:
“Mask applications are diverse and therefore require custom-engineered TPE solutions. Material properties such as surface friction, softness, adhesion to thermoplastics and color can be individually adapted. With our years of experience and the available approvals, we are well prepared for the project discussion with you.”
