### **KRAIBURG TPE introduces new TPE for drinking water applications**

**KRAIBURG TPE, the recognized global TPE manufacturer has developed a new TPE for drinking water applications with NSF/ANSI 61-compliance exclusively for the Asia Pacific market.**

#### **Ideal for a wide scope of drinking water applications**

KRAIBURG TPE's new TF8ONG-NTRL compound comes in one hardness, namely 80 Shore A with 0.95g/cm density. Its durability and flexibility make it suitable for typical drinking water applications such as tube and hose, elastomer pipe fitting, couplings, flexible pipe fitting, plumbing manifold, and many others.

#### **Low odor and flavor properties**

Besides fulfilling the NSF/ANSI 61 testing standard under section 4 with cold water (23°C) and domestic hot water applications (60°C), TF8ONG-NTRL also meets the low odor, flavor and total organic compound (TOC) testing standards according to KTW under hot water application (60°C). In addition, the compound exhibits good adhesion with PP.

#### **Global regulatory compliance**

The compound does not have any curing and crosslinking material in it and meets the (EU) No. 10/2011 Food Contact Plastics Regulation, and US FDA CFR 21 (raw material conformity) quality system regulation.

The TF8ONG-NTRL compound is available in natural color and can be processed via injection molding or extrusion.
